"Uzbekistan Airways" sincerely congratulates all compatriots on the 27th anniversary of the adoption of the Constitution of the Republic of Uzbekistan!

The Constitution of the Republic of Uzbekistan is a strong support and legal guarantee of social development, a bright symbol of independence of our Motherland. Its adoption has become one of the most important stages of the country's sovereignty. The basic law has laid the foundation for ensuring human rights and freedoms, peace and harmony in society, implementing wide-ranging reforms in the political, economic and social spheres. It serves as a solid legal foundation for the consistent development of social relations and defines the vector of interaction between the citizen, society and the state.

The core of constitutional law is the Constitution itself. The role and place of the Constitution in any national legal system is fundamental and paramount. At the same time, every state has its own Constitution and its own path of constitutional development. It should be emphasized that there is no and cannot be a universal constitutional model, which is the only one suitable for all states. In this regard, the Constitution of independent Uzbekistan is no exception.

The path chosen by the country and the successes achieved in the process of gradual implementation of reforms are practical results of the implementation of the provisions of the Constitution of Uzbekistan.
